

Exercise - Customize directory branding

5 minutes

Suppose you've been asked to display your retail organization's branding on the Azure sign-in page to reassure users that they're passing credentials to a legitimate system.

Here, you'll learn how to configure this custom branding.

To complete this exercise, you must have two image files:

- A page background image. This must be a PNG or JPG file, 1920 x 1080 pixels, and smaller than 300 KB.
- A company logo image. This must be a PNG or JPG file, 280 x 60 pixels, and smaller than 10 KB.

Customize Azure AD organization branding

Let's use Azure Active Directory (Azure AD) to set up the custom branding.

1. Sign in to the [Azure portal](#) .
2. Go to your Azure AD organization by selecting **Azure Active Directory**. If you're not in the right Azure AD organization, go to your Azure profile in the upper-right corner and select **Switch directory** to find your organization.
3. Under **Manage**, select **Company branding** > **Configure**.
4. Next to **Sign-in page background image**, select **Browse**. Select your page background image.
5. Next to **Banner logo**, select **Browse**. Select your logo image.

Configure company branding

Banner logo
Image size: 280x60px
File size: 10KB
File type: Transparent PNG, JPG, or JPEG ⓘ

[Remove](#)

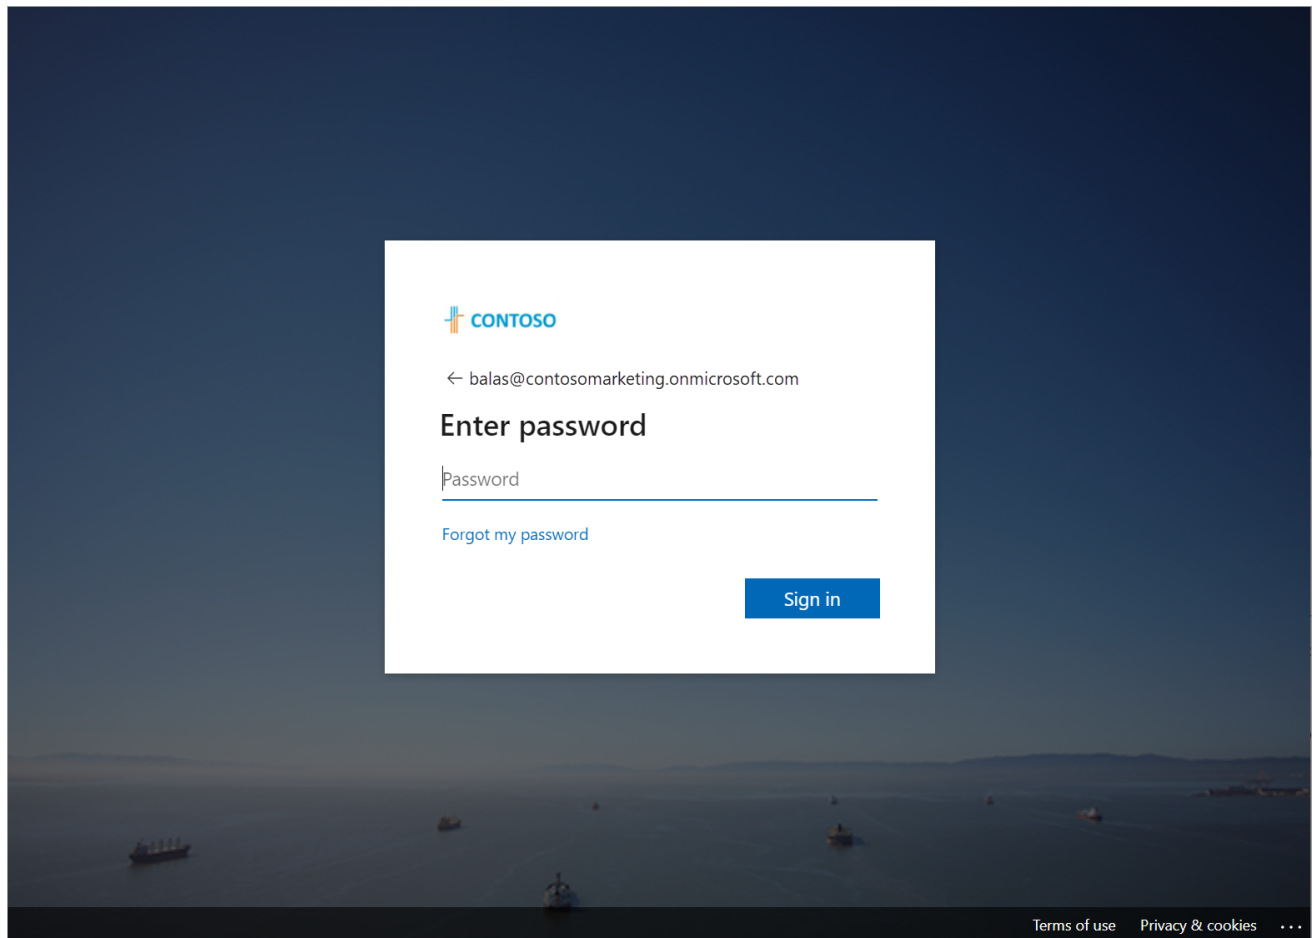

6. Select **Save**.

Test the organization's branding

Now, let's use the account that we created in the last exercise to test the branding.

1. In a new browser window, go to <https://login.microsoft.com> .
2. Select the account for **Bala Sandhu**. Your custom branding is displayed.

3. Select **Forgot my password**.

Get back into your account

Who are you?

To recover your account, begin by entering your user ID and the characters in the picture or audio below.

User ID:

Example: user@contoso.onmicrosoft.com or user@contoso.com

Enter the characters in the picture or the words in the audio.
