

# Summary and resources

1 minute

Azure Administrators commonly obtain and manage Azure subscriptions. Azure subscriptions help you effectively identify and manage costs for your organization, so you can provide services and resources for specific scenarios.

In this module, you learned about supported Azure regions, and how to locate Azure services. You reviewed the features and use cases for Azure subscriptions, and how to obtain subscriptions. You explored features and billing for different types of Azure subscriptions, and how to apply resource tagging. You discovered how Microsoft Cost Management can be used for cost analysis, and learned how to identify ways you can reduce your billing costs.

## Learn more with Azure documentation

- Read more about [Microsoft Cost Management](#) and billing for Azure.
- Explore how to [create an additional Azure subscription](#).

## Learn more with self-paced training

- Practice using [Microsoft Cost Management to analyze costs and create budgets](#).

## Learn more with optional hands-on exercises

- Plan and manage [your Azure costs \(sandbox\)](#).
