

Scope the initiative definition

1 minute

After you create your initiative definition, the next step is to assign the initiative to establish the scope for the policies. The scope determines what resources or grouping of resources are affected by the conditions of the policies.

Here's an example that shows how to configure the scope assignment:

Policy - Assignments

Search (Ctrl+ /)

Assign initiativeAssign policyRefresh

Scope: Visual Studio EnterpriseDefinition type: All definition typesSearch: Filter by name or id...Category: All categories

Total Assignments: 2Initiative Assignments: 2Policy Assignments: 0

name	Scope	Type	Policies	Category
East Region	Visual Studio Enterprise	Initiative	2	General
ASC Default (subscription: ...)	Visual Studio Enterprise	Initiative	96	Security Center

To establish the scope, you select the affected subscriptions. As an option, you can also choose the affected resource groups.

The following example shows how to apply the scope:

Scope

Subscription

ASC DEMO

Resource Group
