Summary and resources

2 minutes

Azure Policy is a service in Azure that enables you to create, assign, and manage policies. Azure Policy helps you define and implement your governance strategy by using policies to control and audit your resources.

In this module, you explored how to implement Azure policy definitions and initiatives for your corporate departments. You discovered how to create management groups to target specific policies and spending budgets. You reviewed how Azure policies can be scoped to meet compliance regulations.

Learn more with Azure documentation

- Peruse Azure Policy documentation.
